Objective :

Computer Science graduate with a strong foundation in Artificial Intelligence, Data Structures & Algorithms, and core software development concepts. Hands-on experience in machine learning techniques using Python, with practical knowledge of libraries such as NumPy and Pandas for data analysis and model building. Actively seeking an entry-level role in Artificial Intelligence or Software Engineering where analytical thinking, problem-solving skills, and AI-driven solutions can be applied to build efficient and scalable systems.

Education:

Bachelor of Technology in Computer Science Engineering (Artificial Intelligence)
Babu Banarasi Das University, Lucknow
Expected Year of Graduation: 2026 | CGPA: 7.35/10.0 (Completed 7 semesters)

Intermediate (Indian School Certificate)
Career Convent College, Lucknow
Year of Completion: 2022 | Percentage: 75.67%

Projects :

Heart Stroke Risk Prediction | Python, Scikit-Learn, Pandas, Matplotlib, Seaborn

- Built a machine learning model to estimate the risk of stroke by analyzing key health factors such as age, blood pressure conditions, heart disease history, BMI, and glucose levels.
- Performed complete data preparation tasks including handling missing values, encoding categorical data, and applying feature scaling to improve model efficiency.
- Achieved an accuracy of 90% on test data using Random Forest and Logistic Regression models, with performance evaluated through confusion matrix and standard classification metrics.

Bluetooth-Controlled Home Automation System | Aug 2024 – Sep 2024 | C++, IoT Principles

- Designed and implemented an IoT-based home automation system that allows users to control household appliances through a smartphone using Bluetooth communication.
- Improved user convenience and power efficiency by introducing automated control features and easy-to-use interaction mechanisms.
- Demonstrated the working prototype at Tech Expo 2024, showcasing real-time performance and effective integration of hardware and software components.

Technical Skills :

- **Languages**: HTML, C++, Python, Java
- **Libraries and Frameworks**: NumPy, Pandas, Matplotlib, Scikit-Learn
- **Tools and Technologies**: Visual Studio Code, GitHub, MySQL
- **Core Competencies**: Data Structures and Algorithms, Machine Learning, Database Management Systems (DBMS),Using AI efficiently, Video editing, Photo editing

Soft Skills :

- Clear and confident verbal and written communication skills
- Ability to adjust quickly in fast-changing and challenging environments
- Strong team coordination with a collaborative work approach
- Effective time planning and task prioritization skills
- Logical thinking with a practical approach to problem solving
- Experience in guiding and supporting team members when required
- Creative mindset with an interest in innovative ideas and solutions
- Basic experience in photography and videography for professional and academic use

---

Certifications :

• **Machine Learning Training – GRAS Education and Training Service Pvt. Ltd. (Jul 2025 – Aug 2025)**
Gained practical experience in supervised and unsupervised machine learning techniques, data preprocessing, and model development using Python and Scikit-learn.

• **Data Analytics Job Simulation – Deloitte Australia (Forage) (May 2025)**
Participated in a virtual job simulation focused on data analysis workflows, analytical thinking, and the use of business intelligence concepts.

• **TechXplore Project Exhibition – BBD University School of Engineering (Aug 2024)**
Presented a technical project at a university-level exhibition, highlighting innovation, technical understanding, and effective presentation skills.

• **Soft Skills Training Program – Learnovate Enterprises (Nov 2024)**
Developed professional communication abilities, teamwork skills, and basic leadership qualities through structured training sessions.
